Subject: WLL social media posts

FYI, I posted these to our social media accounts this evening.

Twitter

Concerned about recent reports on [#WestLakeLandfill](#). Please see EPA's newsletter <http://bit.ly/1LzqSBv>. There's no imminent danger.

Facebook

If you're concerned about recent reports on conditions at the [#WestLakeLandfill](#) we hope you'll read the latest EPA newsletter <http://bit.ly/1LzqSBv>. In this edition we share research and monitoring results provided by EPA, MDNR and others that demonstrate there is no imminent offsite risk to public health from the radiologically-impacted material at the West Lake Landfill. We also want you to know we see no imminent danger that the subsurface smoldering event in the adjacent Bridgeton Landfill will reach the RIM in the West Lake Landfill. We are working closely with state and local officials to ensure public health is protected.

Curtis D. Carey, Ph.D.

Region 7 Public Affairs Director

U.S. Environmental Protection Agency
